HTML Interview Questions for 2 Years Experience

Q: What is the difference between <section>, <article>, and <div>?

A: <section> represents a generic standalone section. <article> is for self-contained content like blog posts. <div> is a generic container with no semantic meaning.

Q: What is the use of the 'defer' and 'async' attributes on the script tag?

A: 'defer' loads the script after HTML parsing. 'async' loads the script while HTML is still parsing but doesn't guarantee order.

Q: What are semantic tags in HTML and why are they important?

A: Semantic tags clearly describe their meaning, improving readability and accessibility (e.g., <header>, <footer>, <nav>, <main>).
